The following is an examiner's statement of reasons for allowance: Applicants arguments regarding the resinous nature of the polyisocyanate are persuasive in view of the trade literature supplied. The closest prior art of record is Epple et al. This reference fails to teach or fairly suggest the processes claimed instantly wherein a toner base with specified components is admixed with a connector base and a reducer base.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
